

Andrei Tolstykh

Staff Product Designer & Design Technologist

Saarbrücken, Germany | tolstykhandrew@gmail.com | +49 17653480027 | andreiddls.github.io/about-me/

Work authorization: EU work permit, Germany-based — no visa sponsorship required

PROFILE

Lead / Staff Product Designer and Design Technologist with 9+ years of digital product experience. Specializes in the intersection of UX strategy, scalable design systems, and frontend engineering for mission-critical enterprise platforms and emerging AI ecosystems. Track record includes architecting an in-house enterprise platform at Sberbank HQ replacing standard SAP Fiori for 20K+ monthly active users, and directing end-to-end product design for AI evaluation systems at QuantPi. Bridges the gap between product vision, complex business logic, and code through AI-augmented workflows (Claude Code, Codex, Storybook, React).

EXPERIENCE

Lead Product Designer / Design Strategist

QuantPi (Saarbrücken, Germany) | September 2022 – Present

- Lead end-to-end product design, information architecture, and UX strategy for an enterprise AI testing and governance platform.
- Architect and govern two scalable design systems in Storybook, ensuring design-token synchronization across Figma and React frontend repositories.
- Pioneer AI-native prototyping and CLI environments (Claude Code, Codex, terminal toolchains) to pressure-test edge cases and accelerate dev handoff.
- Facilitate customer discovery and generative research with enterprise clients to translate technical AI metrics into clear, human-centered decision flows.

Lead Product & UX Designer (Enterprise Platforms)

Sberbank (Central Finance Dept, HQ) (Moscow) | June 2018 – August 2022

- Directed the ground-up product design and architecture of an in-house enterprise platform created to replace standard SAP Fiori for the bank's Headquarters.
- Engineered complex transactional workflows, data grids, and approval systems scaling to 20K+ monthly active users across 10+ multidisciplinary squads.
- Established internal design standards and usability metrics, transforming fragmented legacy tools into modern, consumer-grade enterprise software.
- Consolidated 100+ fragmented financial services into a single scalable product in 6 months from discovery to release.

UI/UX Designer (ERP Competence Center)

Sberbank (Yekaterinburg) | June 2016 – June 2018

- Designed UI component libraries, responsive layouts, and user workflows supporting bank-wide ERP systems transformation.
- Created standardized visual documentation, interactive guidelines, and interface assets for cross-regional engineering and operations teams.

Economist & Financial Systems Analyst

Sberbank (Yekaterinburg) | January 2011 – June 2016

- Conducted financial forecasting, capital planning, and process analysis across enterprise banking units.
- Personally designed and implemented automated data-aggregation models and reporting pipelines, cutting reporting delivery time by over 40%.

SKILLS & TOOLKIT

Product & Design Leadership:

UX Strategy, Complex Enterprise & B2B SaaS, Design Systems, Information Architecture, Wireframing, Rapid Prototyping, Customer Discovery & Generative Research, Usability Testing, Cross-Functional Team Leadership

Design Engineering & Technology:

Figma, Storybook, Design Tokens, React, TypeScript, Tailwind CSS, Webflow, Git, Terminal & AI CLI toolchains (Claude Code, Codex, Grok)

Domain Fluency:

Enterprise ERP & SAP Modernization, Financial Workflows & Analytics, AI Validation & LLM Model Governance, Risk Profiling

EDUCATION

Degree in Computer Science (C++ Programming)

Ural Federal University, Yekaterinburg | 2020

Bachelor's in Computer Science in Economics

Ural Federal University | 2004 – 2009

Specialist Degree in Applied Informatics in Economics

Ural College of Economics and Management | 2009

CERTIFICATIONS

Front-end Developer Program, Yandex | 2022

Google UX Certification | 2021

C++ Coursework, Bauman Moscow State Technical University | 2019
